TRENTON – New Jersey Republican Party Chairman Jay Webber today released the following statement regarding President Obama's visit to New Jersey to campaign with Governor Jon Corzine:

"The people of New Jersey don't have to look any further than today's unemployment numbers - now at 9.2% - to know Governor Corzine's record of failure has led to 17 consecutive months of job losses and the highest unemployment in the state in 32 years. No amount of campaigning by the President or any of Governor Corzine's Washington friends can change this fact. New Jerseyans are hungry for a candidate that represents positive change in Trenton and throughout our state - it's clear they have found that in Chris Christie."
